

Types of Devices That Are Permitted to Use This Ski Area

Basic Premises

1. The device used to go down the mountain must have enough of an edge to turn, slow down and stop.
2. You must be able to stand up while riding the device.
3. Other than skis and snowboards, the device must have a safety leash cord attached to the participant to prevent it from getting away and endangering other persons on the mountain.
4. The device must have a long enough edge to control the speed at which the participant travels down the mountain.
5. The device may not have any engine or other powered propulsion other than gravity.

=====
